## Experience

Job Title: Fron-end Developer

Company: 3035 Tech

From: 02/2022 - 04/2023

Role Description: I was responsible for creating web interfaces both on websites and on complex systems such as SPAs. Using the Figma design as a basis for construction and Swagger for API calls, I collaborated with the entire team, including designers, back-end developers, and testers, to ensure everything was perfectly as expected. I worked with technologies such as React, TypeScript, JavaScript, Next.js, Redux, Styled Components, Git, and Git Flow.

Job Title: Software Development Intern

Company: 3035 Tech

From: 03/2022 – 02/2023

Role Description: I was responsible for creating web interfaces both on websites and on complex systems such as SPAs. I worked with technologies such as React, TypeScript, JavaScript, Next.js, Redux, Styled Components, Git, and Git Flow.

Job Title: Tech Assistant

Company: Ferga Alimentos Ltda.

From: 08/2021 - To: 11/2021

Role Description: Activities related to support the company's employees, with the TOTVS' system. Tests for approval, functional tests of system routines.

Job Title: Credit Recovery

Company: Grupo RedeBrasil

From: 11/2018 - To: 07/2021

Role Description: Activities related to credit recovery, such as active and receptive customer service, negotiations with defaulting customers, registration of registration information in the system and in Excel spreadsheets.
